

# CALIPSOplus – Grant Application for Open Access Publication

## An Integrating Activity for Advanced Communities in Horizon2020

### Grant Application

In CALIPSOplus authors can apply for a grant (max. EUR 1 500) to cover the open-access publishing fees in order to cure this problem and at the same time encourage users to open access publishing. Funding will be given – upon application to the coordinator – with priority to users from countries/ institutions with very small research budgets but wishing to publish excellent research in “gold” open access journals.

#### Grant application

The applicant should send the application via email to the CALIPSOplus Management email (below) including the following information:

- Abstract of project
- Journal
- Draft of publication or accepted paper
- Facility, beamline and date of beamtime where/when experiments of publication has been measured

**Deadline – April 30<sup>th</sup> 2018**

#### Proposal evaluation by CALIPSOplus Executive Board

Proposal evaluation by the CALIPSOplus Executive Board at 1<sup>st</sup> CALIPSOplus Annual Meeting 2018

#### Funding information

Applicants will be informed about evaluation results and will receive further information if the proposal has been approved for funding.

#### Acknowledgement

This project has received funding from the European Union’s Horizon 2020 Research and Innovation programme under Grant Agreement No 730872.

### Open Access to scientific publications

**Open access (OA)** refers to the practice of providing online access to scientific information that is free of charge to the end-user and reusable. 'Scientific' refers to all academic disciplines.

#### Why open access to scientific peer-reviewed publications?

##### Good for science

- Allows scientists to build on previous research results and avoid unnecessary duplication of effort
- **Improved quality and greater efficiency**

##### Good for economy

- Speeds up innovations
- **Faster progress to market**

##### Good for society

- Makes research available to individual citizens and non-profit organizations
- **Greater transparency**

### How to achieve open access in Horizon 2020

Open Access publication in Horizon 2020 is possible by means of so-called “Gold Open Access” and “Green Open Access” publication, respectively.

#### Gold Open Access

Articles published in open access mode (publishing costs borne by the authors, universities or institutes etc.)

e.g. New J. Phys., Optics Express, Nature Comm. Peer-reviewed, purely electronic journals

#### Green Open Access

Published articles or the final peer-reviewed manuscript are deposited in an online repository.

e.g. ArXiv.org

Both options of open access publication are possible. **To emphasize the possibility of Gold Open Access publication** for results obtained in experiments funded by CALIPSOplus the project awards grants for Gold Open Access publication.
